

Thanks so much for your purchase of the Virtual FX 3D Converter.

PLEASE NOTE: The A/C adapter included with your Virtual FX is a **110V A/C** adapter designed only to be used in those countries on that standard (i.e. USA, Canada, Japan). If the power standard in your country is other than 110V A/C, you will need to provide your own A/C adapter. **The specifications are:**

9V DC Output, 800 mAh to 1,000 mAh, Center Positive. The included US power supply should be used for reference only.

We do have an International power supply available and we do not require customers to purchase this unit as most customers that purchase electronics from other countries already have a correct power adapter which would raise the cost of this unit approximately \$24.

If you do not already have this power adapter kit we do have it available separately which you can find it at our website:

Ultimate3DHeaven.com

Or you are welcome to email us a request for this exact item at our cost of only \$24 plus actual shipping at ultimate3dh@yahoo.com

If you have any other questions or if I can be of any further assistance please feel free to let us know.

Thanks, Ultimate3DHeaven
